KnockoutJS

AngularJS

Python(Django)

Backend/API Integration

ExpressJS

NodeJS

PostgresSQL(Navicat and
pgAdmin4)

API integration

Writing Queries

AWS

- EC2

- S3

- RDS

- Lambda

Socket.io

iOS

Swift

General

Git/Github

Jira

Twilio

Auth0

Slack

Microsoft Word

Microsoft Excel

EDUCATION

Coding Dojo, Burbank

JAN 2017 – MAY 2017

Full stack Developer Certificate

Fullerton College, Fullerton

Aug 2013 – May 2015

Associates degree in Business
Administration

PROJECTS

GITHUB: www.github.com/rodrigolee

[GoRn app and website](#)

A scheduling platform and registry for nurses that does all the scheduling through an app and website. It eliminates all paperwork and does invoices/billing straight through the app.

iOS

[Wishlist](#)

A wishlist that allows users to save up for products they want to buy. Can add money to the price of the wanted product through the app until it reaches the desired amount. Used innovative technology that messaged/called nurses to make scheduling easier for both nurses and the hospitals.

MEAN

[Mini Store](#)

Gives users a template to make their own store. Can integrate Shopify easily.

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER, GORN LLC (startup)

July 2017- Oct 2017

- I was an integral part of the software team at GoRN that consisted of me and the CTO. I got direct supervision from and learned through working side by side with a very experienced software engineer. In the company, I worked on the frontend using KnockoutJS, the backend using PostgresSQL, but spent most of my time writing queries and API functions to use in the backend. I did most of our routing with express and the server ran on Nodejs. Also worked on their mobile app using Swift.

SALES REPRESENTATIVE, THE VAULT

January 2016 – December 2016

- Welcomed and helped customers buy clothing and other merchandise. Worked here around 20 hours a week.

SERVER, SAKE 2 ME SUSHI

January 2016 – November 2016

- Catered to and served around 200 people per shift at an all you can eat Sushi restaurant.

SERVER, GEN KOREAN BBQ

January 2014 – December 2015

- Served 200-300 people per shift. High paced environment.
