Profile

I am a highly passionate software engineer with experience developing enterprise level software systems. I have developed a strong understanding of a large number of programming software. I am now seeking a permanent position in a collaborative environment for me to expand my skillsets.

Experience

Software Engineer, JLM Strategic – Mar 2018- Present

- Research, design and implement scalable software applications for information analytics.
- Collaborated closely with other team members to plan, design, and implement robust software solutions to meet customer needs.
- Had to take charge as the head software developer to create and deploy the administration portal that helped our company maintain and grow relationships with external employees.
- Was in charge of deploying our system to an S3 and our backend to an EC2 instance. Also got the SSL and put our front and backend on amazon cloud front systems for load balancing and better content distribution.
- Built out the entire billing system for JLM including submitting time sheets, printing out payroll information to a CSV, sending timesheet and payroll information to a supervisor through email, and having that supervisor approve/disapprove the timesheet through html inside of an email.
- Technology Stack: VueJS, ES6, Babel, Webpack, Express, Node, MongoDB.

Software Engineer (Freelancing) – Nov 2017- February 2018

- Ziller Karaoke: Made their landing page with HTML/CSS and Angular on an S3. Built their admin page with Angular, Express, Node, PostgreSQL on AWS EC2 instance.
- Los Angeles Fashion District Admin Application: Built the Admin page using Angular, Express, Node and PostgreSQL. Made the mobile app with Ionic and Cordova on Angular.

Software Engineer, GoRN LLC – Jul 2017- Oct 2017

- Implemented designs, through experimentation and multiple iterations to achieve desired result
- Continuously established clear operational specifications and formulated software requirements
- Wrote maintainable and extensible code in a team environment
- Worked constantly with business development team to ensure software solutions elevated client side experience.

-Technology Stack: KnockoutJS, ExpressJS, NodeJS, PostgreSQL, Jade/Pug, Less/Sass, Xamarin, AWS: EC2, S3, Cloudfront, Certificate Manager, IAM.

Education

Fullerton College, Fullerton (Aug 2013- May 2015) – Associates in Business Administration
Coding Dojo, Burbank(Jan 2017 - May 2017) - Full Stack Developer Diploma

Skills

FrontEnd: HTML, CSS, Javascript(ES6), Bootstrap, Materialize, JQuery
KnockoutJS, Angular- JS, Jade/Pug, Less/SASS. BackEnd/ Api Integration:
ExpressJS, NodeJS, Python(Django) DataStack: PostgreSQL(Navicat and pgAdmin4), MySQL, MongoDB. AWS: EC2, S3, Lambda, Pipeline. iOS: Swift. General Git/Github, Jira, Twilio, Auth0 Slack, Microsoft Word, Microsoft Excel

References

Kenny Epstein COO at Go RN LLC

-Rodrigo was a valuable member of our software development team. He has a thoughtful and creative approach to problem solving. Confident yet open-minded, Rodrigo also brings a positive spirit and ability to work well in a team environment. I would be glad to both recommend and further discuss Rodrigo's value as a candidate at any time.

Hector Miranda CTO at Go RN LLC

-Rodrigo has potential and he is a quick learner.
